-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2121

DETAILED ACTION

1. Claims 1-69 are presented for examination.
2. A telephone call was made to Sarinder Sachar on June 23, 2004 to request an oral election to the restriction requirement below, but did not result in an election being made.
3. Applicant is advised that the reply to this requirement, in order to be complete, must include an election of the invention to be examined, even though the requirement may be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn towards an apparatus having a central controller, classified in class 700, subclass 9;

- II. Claims 25-34, 42 and 45-54, drawn to a method of determining a propagation delay, classified in class 318, subclass 621.
- III. Claims 35-41, 43-44 and 55-61, drawn to a method of network messaging; classified in class 709, subclass 206; and
- IV. Claims 62-69, drawn to a node, classified in class 713, subclass 153.

6. The inventions are distinct, each from each other because of the following reasons: Inventions I, II, III are different inventions from invention IV. Inventions I, II and IV are different inventions from invention III.

Inventions I and II teach a product and process using the product and since the product may be used using a different process, e.g. the device initially sends out the first query message, there is separate classification in the art. See MPEP 806.05(d).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, and vice versa, restriction for examination purposes as indicated is proper.
